Mudassar ul Islam

Web Developer

@ mudassar290902@gmail.com

Skills

Backend Development

NodeJS, Firebase, Laravel & PHP, MongoDB, MySQL, Postgres, Serverless Platforms

Frontend Development

Svelte, React.js, Vue.js, TailwindCSS

Hybrid / Full-Stack

SvelteKit, Next.js

Deployment

Docker, aaPanel, Hestia, Cloudflare, Firebase, AWS, Linux Server Management

Education

Virtual University of Pakistan

Bachelor of Computer Science
May 2025 - 2029

Punjab College Gujrat

Intermediate Computer Science Degree
Sept 2020

PIPS Gujrat

Computer Science
Sept 2018

Interests

Hobbies

Gaming, Custom Computers, Low-level-programming, Embedded Systems

Languages

English   Urdu

Fluent   Native

I'm a web developer who has worked on various projects in professional and hobbyist environments. I've contributed to & built open-source software and commercial software with thousands of customers. I love experimenting with technology, software and hardware alike.

Experience

Nexthon Technologies / BitFlan   March 2020 - Present

Web Developer   Full-time

🔗 https://bitflan.com/

I've been a lead developer for BitFlan, subsidiary of Nexthon Technologies for more than 5 years at this point. During this period, I've designed, developed and deployed various in-house and commercial projects.

Freelancer   2019 - Present

Web Developer   Part-time

I've also worked part-time as a Freelance Full-stack Developer for hundreds of clients. I've developed projects of various sizes and scope ranging from bug-fixes to large-scale applications while working solo or within teams.

Featured Projects

CyberTools   Aug 2022

Utility based self-hostable SaaS Platform

🔗 Envato Marketplace Page

I led the development and deployment process for CyberTools for BitFlan. This is a commercial product that allows users to build their own fully-featured Utility based software-as-a-service platform at the press of a few buttons.

I also developed the in-house framework on-top of Laravel that powers this project. This framework contains a customizable Admin Panel, Payments processing, Options API, Authentication, i18n, and a custom DRM solution that powers various other projects at BitFlan. It proved to be a game-changer for efficiency.

This product was also featured on the front-page of the Envato CodeCanyon Marketplace.

CORONASTATS   April 2020

Coronavirus Statistics Tracker & Visualizer

🔗 ProductHunt Page

A personal project that was used by millions. It was a Coronavirus 2019 Statistics Tracker that reached #1 Product of the day on ProductHunt.

It was an SPA built using React, hosted on a public Amazon S3 Bucket using Cloudflare and a Linux server with a cronjob to update the data with regular intervals.

I received positive messages and donations from thousands for creating this project.

Other

NAVTTC   Mar 2022 - Aug 2022

Web Development Instructor   Adan I.T Center Gujrat

I was given the opportunity to lecture like-aged people about Web Design and Development through NAVTTC courtesy of the Pakistan Government.

By teaching them the basics and building various small projects over the course of 6 months, I helped them get started with their journey in Software Engineering.
